

Kandinsky Circles

Choose several different favourite colours from your coloured paper

Decide on your background colours

Now rip and tear lots of coloured paper circles and put them on top of each other like on the front of this card.

A famous artist called Kandinsky used shapes just like these in his paintings.

Try this:

Swap the coloured circles around or cut new ones.

Use different shapes – like squares, stars or other shapes

When you like the look of your picture you can glue it down.
